

TECHCEDENCE

Techcedence is a trusted leader in IT solutions, consulting, and software development, serving a diverse global clientele. Our mission is to accelerate technology adoption, simplify complexities, and transform ideas into reality. From concept to delivery, we provide unwavering support, helping clients navigate technological challenges and achieve their goals efficiently and on time.

TracInv is an all-in-one inventory tracking system designed to scale with your business. It seamlessly integrates with existing systems, enabling you to track inventory, automate orders, and maintain total warehouse control

Comprehensive Data Recording

Captures every detail from inbound, internal transfers, and outbound processes to audits, ensuring complete visibility and traceability of inventory data

Enhances the efficiency of human resources by simplifying tasks, minimizing manual efforts, and avoiding errors due to manual data entry

Optimized Resource Utilization

Multiple-Warehouse Support

Provides centralized management for multiple warehouses, allowing seamless stock tracking and control across various locations

Simplified Delivery Processes

Streamlines delivery by providing clear directions on where to pick items, which items to pick, and how to expedite the process

Customizable System Configuration

Offers extensive customization options to tailor the system's functionality to specific business processes and requirements

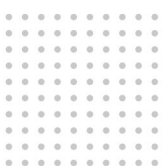

Advanced Tagging Technologies

Supports various tagging options, including BLE, NFC, RFID, and Barcodes, to enhance inventory accuracy and traceability

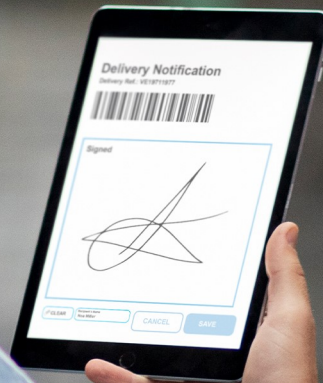

Seamless ERP Integration

Integrates effortlessly with any third-party ERP system and can function as a standalone tool if needed

Our Flagship Products
